

Top Ten Reasons to Choose Our Office for Your Periodontal and Implant Needs

1. We had the **first periodontal laser in the country** in 1990. Since then, we have completed over 5,000 successful laser periodontal procedures, more than any other periodontal practice in the world. This laser treatment is much less invasive than traditional cutting and stitching surgery, and promotes quicker healing. Both doctors recently received the LANAP Protocol Hero Medal for their studies on lasers.
2. Over 30 years ago, our office **pioneered treating the bacterial cause of periodontal disease, not just the resultant pockets**, which helps prevent the recurrence of the infection. We have analyzed over 200,000 bacterial samples under the microscope, more than any other periodontal practice in the world.
3. We were the **first office in South Florida to be trained in the Chao Pinhole Surgical Technique**. Since then, we were invited by Dr. Chao, the inventor of the technique, to teach at his course in California and to be one of three clinicians invited to submit our results for a multi-center Pinhole study.
4. If you are anxious, we offer both **oral and IV sedation** to make you very comfortable during treatment. Most procedures can be accomplished in **only one visit**. For additional comfort, we use the infrared **VeinViewer** technology, which helps ensure comfortable venipuncture the first time. We have safely completed more than 4,000 sedation procedures.
5. For implants, Dr. Mark McCawley completed three years of graduate training in their placement and is **board certified in dental implant surgery**. He has successfully placed hundreds of implants.
We were one of the first ten offices in the country to use the revolutionary **Navident computer-guided implant placement system**, the same system used in neurosurgery. We use only the top of the line, most-researched implants, not generic knockoffs.
6. We have **five published research studies** on laser treatment, and have **pioneered the treatment of failing, infected implants** to save them if at all possible. We recently lectured to an international implant meeting on our technique to save failing implants.

7. **We have written two books** for patients and clinicians on how to treat periodontal disease, peri-implant diseases and other oral diseases. These are available at our office, on Amazon, and downloadable on our website, mccawley.com.
8. Dr. Tom McCawley is **past president** of the North American Society of Periodontists, the Florida Association of Periodontists, and the Broward County Dental Association. Dr. Mark McCawley is on the executive council of the Broward County Dental Association, and is **Board Certified in periodontology and dental implant surgery**. Both doctors lecture annually to the periodontal graduate periodontal students at Nova Southeastern College of Dental Medicine on the microbiological cause and treatment of periodontal Disease and have **lectured internationally** on this subject.
9. We have successfully served the periodontal and implant needs of Broward County for **more than 40 years**. We have a synergistic **father and son team** to treatment plan your needs for the best, least invasive treatment.
10. We have a kind, well-trained team with several members serving you for from 14 to 30 years, Part of our mission states: "Our team believes that through **our advanced technology and genuine personalized care**, we can make a difference in your life."

Our goal for you is "**Saving Lives by Saving Smiles.**"
